

## **AMENDMENT TO THE SUBSTITUTE SPECIFICATION**

Please replace the last paragraph on page 5 of the Substitute Specification with the following amended paragraph.

A lock with a housing 10 is shown in Fig. 1. The housing 10 has a bottom 11, from which lateral walls ~~[[11]]~~ 12 arise all around. At the top as shown in Fig. 1, the housing 10 forms a connecting side. There, the housing 10 is closed off by a screwed on cover 20. As revealed in Fig. 2, the housing 10 has two fastening flanges 13 with fastening receivers 13.1 on the sides of the cover 20. With these the lock can be screwed on the inside of a door, flap or the like, for example.
